- simple to operate
- battery or mains powered
- auto-off feature
- optional stainless steel plate

# Model 402

## COIN CHECKER

The model 402 coinchecker from Salter Brecknell is ideal for applications where total portability combined with high accuracy coin checking is required.

Pre-programmed with all Sterling coin weights, the 402 is simple to operate - just select the coin value you are counting, load the scale and read the value in Sterling. No need to calculate value from weight, the 402 does that for you!

Powered from batteries or via a mains adaptor, which is included, the 402 can be easily moved to where the counting needs to take place. An auto-off feature is built in, to conserve battery life.

An optional coin scoop is available to make transfer of coins into bags quick and easy and the tare/zero function allows the weight of any container to be removed from the weighing process to ensure accuracy of the coin counter.
